

The meet over all our paths was this WSSE,
As we participants were an over-approximation of all the country;
You organizers have done an unbounded model checking
To ensure our witness function of happiness had no lacking.

Immense learning became the invariant of this school
The points-to set of our knowledge underwent widening with this rule;
An abstract refinement of each talk made us realize
Clumping of various domains can indeed be so nice.

The speakers ensured complete path coverage,
And the motivational sessions gave us k-unshrinkable courage
A trace of this entire week to us will now show
All Galois connections we made, and each other got to know.

No pattern matching on the lunch could be made
Because with a different menu each day, its dynamic slicing was great!
The banquet and student demos when we concretized
Showed this winter school could not be fault localized

Dipali and Sayandeep ensured we students were safe, sound and complete
Their flow sensitiveness to our needs was truly replete;
The post condition of this program was to make us all smart,
For this, dear organizers, I thank you from the bot of my heart.
